Assistant Commissioner for Patents, Washington, D.C. 20231

Dear Sir:

Enclosed is an English translation of the International Preliminary Examination Report in this application for the Examiner's review. The Examiner's attention is directed to the Reasoned Statement under Article 35(2) at Section V., for the International Examiner's discussion.

Favorable consideration of the present application is respectfully requested.

Respectfully submitted,

Applicant

OCE PRINTING SYSTEMS GMBH et al

1. Transmittal of the translation to the applicant.

The International Bureau transmits herewith a copy of the English translation made by the International Bureau of the international preliminary examination report established by the International Preliminary Examining Authority.

2. Transmittal of the copy of the translation to the elected Offices.

The International Bureau notifies the applicant that copies of that translation have been transmitted to the following elected Offices requiring such translation:

CA,JP,US

The following elected Offices, having waived the requirement for such a transmittal at this time, will receive copies of that translation from the International Bureau only upon their request:

ΕP

3. Reminder regarding translation into (one of) the official language(s) of the elected Office(s).

The applicant is reminded that, where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report.

It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned (Rule 74.1). See Volume II of the PCT Applicant's Guide for further details.

	i-establishment of opinion with regard to novelty, inventive step and industrial applicability
1. The indus	questions whether the claimed invention appears to be novel, to involve an inventive step (to be non obvious), or to be strially applicable have not been examined in respect of:
	the entire international application.
\boxtimes	claims Nos.
becau	ise:
	the said international application, or the said claims Nos.
	relate to the following subject matter which does not require an international preliminary examination (specify):
•	
\boxtimes	the description, claims or drawings (indicate particular elements below) or said claims Nosare so unclear that no meaningful opinion could be formed (specify):
•	
	the claims, or said claims Nos are so inadequately supported by the description that no meaningful opinion could be formed.
	no international search report has been established for said claims Nos.
	no international search report has been established for said claims fos.
2. A mea	ningful international preliminary examination cannot be carried out due to the failure of the nucleotide and/or amino acid
sequen	nce listing to comply with the standard provided for in Annex C of the Administrative Instructions:
	the written form has not been furnished or does not comply with the standard.
	the computer readable form has not been furnished or does not comply with the standard.

International application No.

IV. La	ack of unity of invention	Min.	
1. In r	response to the invitation to restrict or pay additional fees the a	pplicant has:	
	restricted the claims.		
	paid additional fees.		
	paid additional fees under protest.		
	neither restricted nor paid additional fees.		÷
2. 🔀	This Authority found that the requirement of unity of invention not to invite the applicant to restrict or pay additional fees.		
3. This	s Authority considers that the requirement of unity of invention	n in accordance with Rules 13.1, 13.2 and 13	3.3 is
	complied with.		
M	not complied with for the following reasons:		·
;	See Annex		
	• •		
		•	
I. Cons	sequently, the following parts of the international application w tablishing this report:	vere the subject of international preliminary	examination
•	all parts.		
	the parts relating to claims Nos.		

International application No.
PCT/EP 00/04312

Supplemental Box

(To be used when the space in any of the preceding boxes is not sufficient)

Continuation of: III.1.

 Claim 15 seeks to define a program (interpreter) by means of a data carrier which is not a component of the program - see Guidelines, Chapter III-4.8a.

 Claim 20 seeks to define a process by means of a program (interpreter) and not by means of the steps of the process.

International application No. PCT/EP 00/04312

Supplemental Box

(To be used when the space in any of the preceding boxes is not sufficient)

Continuation of: IV.3.

1. Claim 16 relates to load balancing during operation of a network for interlinked computers. A server responds to a request by determining whether it can process the request and if it determines that it cannot do so, it routes the request to another server which is able to execute it.

Claim 9 relates to an interpreter. The interpreter is configured to interpret and execute executable language elements in a server.

- 2. It has been shown that the independent claims referred to in point 1 (above) have no common features and are based on different concepts.
- 3. Claim 16 is considered to be an independent claim as explained in Box V, point 2.

International application No. PCT/EP 00/04312

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;

Statement			
Novelty (N)	Claims	1-14, 19	YES
	Claims	16-18	NO
Inventive step (IS)	Claims	1-14	YES
	Claims	16-19	NO
Industrial applicability (IA)	Claims	1-14, 16-19	YES
	Claims		NO
	Novelty (N) Inventive step (IS)	Novelty (N) Claims Claims Inventive step (IS) Claims Claims Industrial applicability (IA) Claims	Novelty (N) Claims 1-14, 19 Claims 16-18 Inventive step (IS) Claims 1-14 Claims 16-19 Industrial applicability (IA) Claims 1-14, 16-19

- Citations and explanations
 - The subject matter of Claim 16 is not novel PCT Article 33(2).

WO-A-99/18534 (D1) discloses a system for operating a network for interlinked computers, where files stored in a server can be transmitted from the server to the client, when the client requests this by sending an appropriate file address to the server, and the server offers the client one or a plurality of services - see page 1, lines 5-18. When a client requests a service, the server receiving the request uses certain basic parameters of the request to determine whether it can process the request and if the server determines that it cannot do so, it routes another server to the client which can execute the request - see page 4, line 29 to page 5, line 6; page 9, lines 3-11, Figure 1.

2. According to the applicant, Claim 16 should be regarded as a dependent claim. This is incorrect, since the claims in question, Claims 1 to 8, are device claims and in consequence belong to a different category from process Claim 16 - see also Guidelines, Chapter III-3.8.

International application No. PCT/EP 00/04312

- 3. The additional features of the dependent
 Claims 17-19 do not add anything new or inventive to
 Claim 16 since said features are either known from
 the cited prior art or are conventional measures.
- 4. The subject matter of Claim 1 is novel and inventive (PCT Article 33(2) and (3)).
- 4.1 Claim 1 contains the features of Claim 16, which are known from **D1**.
- 4.2 Claim 1 differs from D1 in that the data stored in the server contain language elements executable both in the client and in the server. In the server there is an interpreter to interpret and execute the language elements executable in the server. The interpreter also performs a conversion between different data formats when a connection is set up through a gateway to another server.

The first-hand interpretation and execution of the language elements executable in the server afford a reduction of the programming load since it is no longer necessary to generate executable language elements via the language elements of another language.

4.3 This process is not obvious from the prior art.

D1 deals mainly with load balancing between servers. The treatment of files with language elements executed on different platforms is not entered into.

International application No.
PCT/EP 00/04312

EP-A-0 874 306 discloses a server with a fundamentally different interpreter. The function of the interpreter is to translate between different print formats and to forward commands to interfaces connected to printers. EP-A-0 872 792 discloses an interpreter which differs from that of the present application. Said interpreter is configured for the local translation of HTML files.

WO A 96/29663 does not disclose an interpreter in a server for interpreting and executing executable language elements contained in data files stored in the server. The scripts disclosed in said document are executable programs which have already been translated. The function of the scripts is to transform data requested by a server, for example from a database, into HTML documents which can then be displayed by an HTML browser.

EP-A-0 889 418 is less relevant, because it relates to redirection by URL.

- 5. Claim 9 relates to an interpreter such as that already defined in Claim 1. Thus, Claim 9 is likewise novel and involves an inventive step.
- 6. Dependent Claims 2-8 and 10-15 relate to further embodiments of the subject matter of Claims 1 and 9 and in consequence are also novel and inventive.

International application No. PCT/EP 00/04312

VII.	Certain	defects	in	the	international	application
------	---------	---------	----	-----	---------------	-------------

The following defects in the form or contents of the international application have been noted:

 Claim 1 has not been drafted in the two-part form defined by PCT Rule 6.3(b). The features of Claim 1 on lines 5-13 are common knowledge.
